ELITE INTERNATIONAL CATALOGUE

ELITE
Made In Turkey

The experience
of over 35
years.

Institutional

The Executive Management of **ELITE** improving its production technology continuously in the domestic and global market since 1979, believes in the necessity of an effective Quality Management System in order to retain customer satisfaction at the top level today and hereinafter.

ELITE Quality Management System is applied in conformity with ISO 9001:2008 CE, Quality, BSCI, Ghost, Standard and TSE to the whole Enterprise that takes active role in all production phases and takes advantage of the latest technologies. **ELITE** pursues the objective of continuous and sustainable system development through extensive sector experience, complying with the legal obligations and protecting the employee rights.

In this context, our quality goals should be set, pursued and reported. Our resources should serve to our objectives.

Livinox was born as a brand name by **ELITE**, for export stainless steel kitchen sinks.

ELITE
Group
Companies

why you should choose **ELITE** ?

TOUGHER; more durable than porcelain /cast iron.

KEEPS IT LUSTER; won't rust, stain or fade. Finish resists scratches. Hand-buffed finish keeps luster long after other materials show their age.

ABSORBS SHOCK; Stainless steel composite "gives" on impact to cushion glasses and dishes against breakage.

EASY TO KEEP CLEAN; Retains original luster when cleaned with household cleanser and soft towel. Sanitary surface just one reason healthcare facilities trust Kromeve sinks.

GREATER BOWL CAPACITY; The strength and flexibility of for deeper sinks bowls. More usable space overall than cast iron or porcelain.

COMPLEMENT ANY DECOR; Clean lines and cool textures reflect surrounding colors and patterns. Stainless steel complements your decor and composite complete your decoration with many colors

MATERIAL; AISI 304 18/8 cr.ni. Stainless steel. High granite composite, tempered glass.

How to install a sink...?

Place the sink upside down in the position where it is to be installed, and trace the outline of the sink on the counter top with pencil.

Draw another line 10 mm inside the first line. Cut a hole in the counter top following this second, inner, line. (*If a pattern is included in the package, then use it to cut the hole in the counter top.)

Adhere the sealing tape around the under side of the edge of sink, starting not at a corner, but any other random spot. Ensure that the tape is sealed smoothly at the bottom of the rim between the clip rail and the edge of the perimeter of the sink. In case that the packaging includes a spongy sealing tape, adhere the tape closer to the edge of the sink, being careful not to overhang it.

Place the fixing clips evenly space around the perimeter of the sink, and pull them up to lock into their horizontal position. To place the sink into the work top, push the metallic part of the clips inward.

These fixing clips are designed to be used in counter tops 30-40 mm. If your counter top is thinner, insert wooden wedges between the counter top and the clips so as to secure them.

Use a hand screwdriver to screw partially the fixing clips by following the order that the drawing indicates. When all the clips have been relatively secured in place, repeat the procedure by tightening completely each fixing clip.

Sink maintenance

Our products are made by AISI 304 18/8 cr.ni. If you follow below mentioned kitchen sink maintenance instructions, stainless steel will keep its fine and clean appearance at all times.

After using the kitchen sink wipe off stains, rinse with water and scrub with dry cloth. Use **ELITE** inox wax produced for steel products periodically surface polishing paste. After cleaning the surface with **ELITE** inox wax applied to a soft cloth or sponge, rinse it with plenty of water and then dry the surface.

Acids, silver cleaning material, salty solutions and wall paper adhesives usually leave stains within couple of hours of their use. If this type material ever touches the kitchen sink after cleaning them immediately, rinse with plenty of water and dry the surface with cloth.

Do not leave wet metal products made of iron or similar material that can easily get rusted on the kitchen sink for long periods of time. The rusts of those leave stains on the surface of kitchen sink.

DO NOT USE THESE; Cleaning / scrubbing powder, hard cleaning sponges and brushes that scratch the surface of the kitchen sink.

Sometimes scratches may appear on surface during normal use, but they do not lower the quality of kitchen sink. A very thin layer of oxidation appears on the surface of stainless steel which provides protection against corrosion and erosion.
