ABOUT OUR COMPANY

Niagara Conservation is a prime global source for energy and water conservation products and programs worldwide. Unlike our competitors, we are a vertical manufacturer that has grown our company and facilities to provide you the highest quality products with the best conservation technology available.

The Niagara name has become synonymous with innovative conservation for a growing customer base of utility companies, government leaders, energy management officials, and eco/cost conscious homeowners and developers.

Today—as climate change, population growth, and record droughts present an unprecedented strain on our water supply—we are doubling down on our purpose and pushing our technology to invent new ways for our customers to conserve water without sacrificing performance.

OUR STORY

We Know It's Not Very Original, But It All Started In A Garage...

Niagara Conservation Founder, Bill Cutler, is what you could call an obsessive tinkerer. As a champion of water conservation long before it was cool, that obsession often turned to the showerhead. "Why should something so simple be so wasteful?"

That curiosity soon grew into an all-consuming quest to build the greatest water-saving product in history. Bill quickly began to accumulate dozens, even hundreds, of shower-heads in his home garage to explore their inner-workings. All that tinkering paid off in 1977, when he developed the first Niagara showerhead—a watershed moment in every day conservation.

Forty years later, that scrappy, one-man operation has grown into a multi-million-dollar organization. The Niagara name has become synonymous with innovative conservation for a growing customer base of utility companies, government leaders, energy management officials, and eco/cost-conscious homeowners and developers.

The Niagara patented toilet line features revolutionary Stealth Technology, creating a high performance flush at 3.0 LPF. This means water bill savings without sacrifcing performance and satisfaction.

Other benefts include minimal maintenance flush system, no double-flushing, and technology that has a fixed rate that ensures a true 3.0 liter per flush every time.

A Niagara toilet is not only the perfect choice for new construction, but its large footprint and oversized structure also makes it ideal for retrofiting there is no need to replace floor tiles or boards as it will cover the pre-existing footprint.

All Niagara toilets are warrantied for 10 years against any manufacturing related defects, parts and porcelain.

BEFORE THE FLUSH

- 1. Water begins to refill the inner chamber and the tank surrounding it.
- 2. As water fills the inner chamber, it pushes air into an air transfer tube.
- 3. Air leaves the transfer tube and pressurizes the trapway.
- 4. Air pressure exerted on the "bowl side" of the trapway creates a larger water surface.

DURING THE FLUSH

- When the button ispressed, water leaving the tank forces water through the openings in the side and front of the bowl rim.
- 2. Water flows down the bowl, thoroughly rinsing the surface.
- 3. Water leaves the tank and enters the trapway under pressure.
- 4. As water leaves the inner chamber, it pulls air from the trapway into the transfer tube.
- 5. Air leaving the trapway creates a vacuum that accelerates the force of the water. This "vacuum-assist" helps the siphon effect beginsooner and last longer to complete the flush more efficiently.

Niagara's patented Stealth Technology® has a vacuum-assist pull so water doesn't have to do all the dirty work and a noise-cancelling tank so your business is your business.

AIR WATER

INNER CHAMBER

Water fills the tank and inner chamber, forcing air to the top of the chamber and down the transfer tube.

LARGER SURFACE AREA

TRAPWAY

Air is forced through the transfer tube into the trapway, exerting positive pressure on the water in the bowl. This pressurizes the trapway and creates a larger water surface area in the bowl.

SHOWERHEADS

Showerheads represent a significant portion of your home's water consumption. Our Water-Saving Kits are a special combo of ultra-high-efficiency technology products that help you save water and slash your utility bill without putting a dent in your daily routine. Each kit features a Niagara along with your choice of a high-efficiency showerhead and three high-efficiency aerators. Mix and match the kit to suit your needs and still come out saving money. A complete water-saving kit can potentially cut at typical household's annual water bill by as much as 50%. Reducing the amount of hot water used in showers and faucets will save on your electric or gas bill as well! With record droughts and rising temperatures, being responsible with the water and energy we have is more important than ever. Saving money is just the cherry on top. Niagara's showerheads are the ultimate high-efficiency product. Unique designs coupled with Equiforce Technology allows for a more enjoyable shower.

Enjoy a shower longer without the guilt of wasting as much as a traditional showerhead.

VALUES

FOUCS

We Focus On The Customer's Needs And Expectations.

Our customers mean the world to us. While the rest of corporate America lives by the mantra, "Bigger is better," we prefer to grow with the spirit of a small company. The kind that knows its customers and cares about them. It may seem like an old fashioned way of doing business but at Niagara, it's the only way we know. Our eyes and ears are always open. We work to serve the people who rely on our products. With the right attitude and team members. we stay focused on providing brilliant conservation products that perform without sacrificing

INTEGRITY

We Act With Integrity In All Our Business Practices.

At Niagara, integrity isn't just something we pay lip service to, we live it through our actions. Our word is our bond, and our commitment to our customers inspires us to go above and beyond "satisfactory." We see ourselves not as pushers of a product, but as partners in our customer's quest to conserve water for the benefit of their home, their business and the environment.

For Niagara, integrity isn't just a word in Webster's dictionary, it's a core principal built into everything we do. It's not enough to just say we "can" do something, but we actually "do-do" something by backing it up because actions speak louder than words.

COMMUNICATION

We Communicate Candidly With Customers, Vendors, And Employees.

We pride ourselves on open communication. Whether it's teaching our customers about conservation, fostering lasting relationships with vendors, or helping our employees become better stewards of water, we're always working to ensure every voice is heard and appreciated.

RESPECT

We Treat Each Other With Respect.

Innovating ways to save water isn't a "go it alone" kind of mission. It's a group effort. We care as much about our team as we do the environment, and cultivate a culture of mutual respect. Real progress is easier when someone's got your back.

R-E-S-P-E-C-T. it means to us admiration for others and their abilities, qualities, and achievements enables us to innovate the best water-saving products. When we work together and support each other, more is accomplished.

ATTITUDE

We Have A «Can Do» Attitude

Attitude is a little thing that can make a big difference. Our road to success isn't always easy. With the right mindset and attitude, we are able to accomplish our goals and forge new paths.

BUSINESS

TOP OF THE LINE OEM SERVICES

We Have Successfully Completed Various Types Of Projects From All The Construction Sector Types Such As Villas, Offices, Residential Building And Towers, Serviced Apartments And Hotels.

OUR PROJECTS

IN UNITED ARAB EMIRATES

MEYDAN 1500 VILLAS PROJECT

Client : Emirates Air Lines Contractor : El-Seif Status : Completed

Mohammed bin Rashid City – District Eleven, a collection of 1,500 four-bedroom semi-detached villas spanning a total of 450,000 square metres, will be let to Emirates Airline pilots.

.02

MARRIOT LA VILLE HOTEL & SUITES CITY WALK DUBAI

Client: Marriot

Contractor : AlFuttaim Carillion

Status : Completed

The moment you walk in to our lobby, you'll be captivated by The iconic architecture and welcoming open spaces. Rooms, suites and furnished apartments feature warm décor and contemporary artistic flair. Marble bathrooms include a freestanding bath tub and a walk-in shower.

INTERCONTINENTAL DUBAI MARINA

Client : Select Properties Contractor : GCC Status : Completed

Located amidst Dubai Marina and within 10 minutes walking distance from hot spots like Jumeirah Beach Walk, Dubai Marina Mall and a tram station, InterContinental® Dubai Marina is the place to see and be seen. Natural light fills artfully designed interiors revealing a collection of contemporary sculptures. A Michelin-starred chef and expert sommeliers attract discerning diners to our restaurants and bars. Featuring its own Health Club, Spa and outdoor pool, the hotel is a destination in itself.

.04

WEST AVENUE DUBAI MARINA

Client : Select Properties Contractor : CRC Status : Completed

Taking its inspiration from the commercial, aesthetic and architectural elements of New York, the development brings the artistic mastery of early 20th century Manhattan-style architecture to new Dubai. Sleek contours and floor-to-ceiling glass shape its spectacular facade. The development comprises 276 luxury units, including studios, one, two and three bedroom apartments and fabulous penthouses.

STANDPOINT TOWERS DOWNTOWN

Client : Emaar Properties Contractor : ARABTEC Status : Completed

Offering a surplus of design perspective, Standpoint fuses contemporary exteriors with classic interiors located on Mohammed Bin Rashid Boulevard, a bustling thoroughfare lined with retail outlets and vibrant cafes, the twin Standpoint towers are situated in close proximity to Burj Khalifa, the world's tallest building. Designed by international architects Smallwood, Reynolds, and Stewar. Standpoint features studios, one, two, and three-bedroom apartments with a wide range of amenities on its podium level. Standpoint provides residents easy access to the varied lifestyle offerings in Downtown Dubai, including The Dubai Mall and Souk Al Bahar, as well as the world-class hotels.

.06

BOTANICA TOWER DUBAI MARINA

Client : Dubai Select Contractor : GCC Status : Completed

Waterfront Living In a Unique Development

Home to a tranquil oasis in the heart of the city, Botanica is a development like no other. It commands an excellent location between three five-star hotels and Dubai Marina. A striking residential tower compromising the finest apartments, villas and penthouses. And on the 27th floor lies a Dubai first – a tropical botanical sky garden. The only private residence in the city that lets tenants take in the breathtaking Dubai skyline with such serenity.
